EDUCATION

Isfahan University of Technology

2022 – 2026

BS in Computer Engineering | GPA: 18.38/20

Isfahan, Iran

- Awarded the Academic Excellence Award for being recognized as one of the top students based on outstanding performance during the first four semesters.

Sampad High School

2019 – 2022

Mathematics

EXPERIENCE

Isfahan University of Technology

Sept. 2024 – Jan. 2025

Teaching Assistant

Isfahan, Iran

- Assisted Dr. Hamid Reza Hakim in the Microcontroller course, managed course projects and homework assignments, and provided guidance to students.
- Acted as the project designer for the Microprocessor course under Dr. Hakim Davoodi.
- Supported Dr. Seyed Jalal Zahab in the Basics and Fundamentals of Programming course by managing projects and ensuring timely feedback for coding challenges.

Isfahan University of Technology

Jan. 2024 – July 2024

Teaching Assistant

Isfahan, Iran

- Assisted Dr. Seyed Jalal Zahab in the Basics and Fundamentals of Programming course.
- Handled course projects and homework, evaluated student submissions, and provided necessary guidance.

PROJECTS

Smart Classroom Digital Twin | *Three.js, Echarts, Blender, AI*

- Developed a web interface using Three.js to display a 3D classroom model designed in Blender.
- Integrated Echarts to display environmental data visually using charts.
- Implemented actuator control capabilities via a hand gesture recognition AI model using a camera.

LLM Robot Controller | *ReactJS, Tailwind CSS, Django, RAG*

- Built a RAG-based language model to convert casual natural language instructions into robotic commands.
- Designed and implemented the frontend interface using ReactJS and Tailwind CSS.
- Developed the backend using Django and connected the systems utilizing RESTful APIs.

Hotwire Foam Cutter Digital Twin | *Unity, ESP8266, ThingsBoard, MQTT*

- Collaborated on an interdisciplinary project between computer and mechanical engineering to create a digital twin for a hotwire foam cutter in Unity.
- Utilized an ESP8266 microcontroller to transmit temperature and sonar sensor data to the Unity script.
- Configured MQTT for ThingsBoard communication and WebSockets for the Unity connection.

SKILLS

Languages: C, C++, Python, JavaScript, HTML, CSS, SQL

Frameworks & Libraries: Qt (QML), ReactJS, Tailwind CSS, Three.js, Echarts, Django

Embedded Systems & IoT: Arduino IDE, ESP8266, STM32CubeMX, Keil uVision, AVR CodeVision, Proteus, ThingsBoard, MQTT, WebSockets

Tools & Software: Git, GitHub, Linux, Unity, Blender, Render, Vercel, Netlify, LaTeX
